Growing Up and Growing Older: Books for Young Readers©

An Annotated Booklist of Literature to Promote Positive Aging
(Preschool-Third Grade)

Dr. Sandra L. McGuire
Professor Emeritus
University of Tennessee, Knoxville

Director
Kids Are Tomorrow’s Seniors (KATS)
About the Author:
Dr. McGuire is an advocate for combating ageism and promoting positive aging. Positive aging encompasses attitudes, lifestyles, and activities that maximize the potentials of life’s later years and enhance quality of life. She has presented at conferences and published in journals including: *Childhood Education*, *Journal of School Nursing*, *Educational Gerontology*, *Journal of Health Education*, and *Creative Education*; books including: *The Encyclopedia of Ageism and Violence, Neglect and the Elderly*; and in the federal Educational Resource Information Center (ERIC) system. Dr. McGuire is a co-author of a 6th edition community health nursing text where she contributed information on healthy aging and working with older adults in the community.

Dr. McGuire is a Professor Emeritus at the University of Tennessee, Knoxville (smcguire@utk.edu) and formerly Assistant Dean and Professor (Caylor School of Nursing) at Lincoln Memorial University. She is a Fellow of the Association for Gerontology in Higher Education (AGHE), serves on the AGHE K-12 Committee and the AGHE Book Awards Subcommittee. Dr. McGuire is director of the Kids Are Tomorrow’s Seniors (KATS) program and served as a member of AARP’s National Policy Council. Her annotated booklist: *Growing Up and Growing Older: Books for Young Readers* has been used nationally and is available, free online at [http://www.library.lmunet.edu/booklist](http://www.library.lmunet.edu/booklist) and at [http://trace.tennessee.edu/utk_nurspubs26](http://trace.tennessee.edu/utk_nurspubs26).

About the Booklist:
The booklist is an effort to use early children’s literature to combat ageism, promote positive attitudes about aging, and start children on a path to positive aging. Worldwide people are living longer and combating ageism is important to everyone. In the U.S. a child can expect to live to be 80, 90, or 100 years old. It is important to lay a foundation for positive aging and combat ageism with young children.

Ageism has shown to be prevalent in the U.S. and other societies. According to Yale researcher, Dr. Becca Levy, negative age stereotypes tend to become internalized across the life span, can operate unconsciously, gain self-relevance, and have psychological, behavioral, and physiological impacts. Age stereotypes tend to become self-fulfilling prophecies. The research of Levy and others has shown that ageist stereotypes and attitudes are predictors of a number of adverse outcomes in old age and that positive, nonageist attitudes can help to combat these adverse outcomes. Older adults with more positive attitudes about aging have a lower prevalence of psychiatric conditions, more resilience when encountering stressful events, better recovery from disabling events, and are living longer than their counterparts who do not. In recent years, ageist attitudes and stereotypes have been shown as risk factors for cardiovascular events later in life and as a predictor of Alzheimer’s disease biomarkers.

Unfortunately, research has also shown that even young children evidence ageist attitudes that inhibit positive aging. This emphasizes the importance of laying a foundation for positive aging at an early age. Ageist attitudes tend to become self-fulfilling prophecies and impact the quality of life experienced as an older adult. The images of older adults in children’s literature play an important role in attitude formation.

The booklist is a compilation of carefully selected children’s literature that contains positive, meaningful portrayals of older adults. Books on the booklist portray aging as: 1) a natural and lifelong process of growing and developing, 2) present similarities between young and old, 3) show young and old enjoying each other and learning from each other, and 4) view older adults as valuable and contributing members of society. Books that focus on death, dying, disease, disability, dependence, and dementia are not included on this list. These topics are not synonymous with aging.

Booklist books help children see their “elder within” (the older person they can become), see the potentials of aging, and think in terms of “lifespan activities” (activities they can do now and can do as an
older person—like reading, writing, art, dance, music, theater, traveling, hobbies, and sports). The books can stimulate interesting discussions about aging, help children learn about growing up and growing older, and start planning for the long life ahead of them.

The booklist starts with: 1) a table of Favorite Books-in-Print, 2) a listing of annotated Books-in-Print, 3) a listing of annotated Favorite Out-of-Print books, 4) a table of Stories with Multicultural Content, and 5) a table with a Topical Listing of booklist books. This topical listing is new to the booklist this year and assists in selecting books with content that readers may be interested in. An annotated listing of out-of-print books is available on request from the author. Out-of-print books are often available through libraries or vendors. Many booklist books are available in multiple formats including eBooks.

Other Resources for Early Children’s Literature and Aging
In 2009, The Association for Gerontology in Higher Education (AGHE) started the AGHE Book Award for Best Children’s Literature on Aging (Preschool-Primary) with meaningful, positive portrayals of older adults. These awards are presented biannually at the AGHE annual meeting. Books receiving AGHE awards are: Pappa Chagall, Tell us a Story (Anholt), Rock, Brock and the Savings Shock (Bair), Shoebox Sam (Barrett), Sometimes its Grandmas and Grandpas and Not Mommies and Daddies (Byrne), Nana in the City (Castillo), The Golden Rule (Cooper), Ain’t Nobody a Stranger to Me (Grifalconi), Marching With Aunt Susan: Susan B. Anthony and the Fight for Women’s Suffrage (Murphy), Niwechihaw/I Help (Nicholson), and The Turtle of Oman (Nye). Anyone can nominate books for the award by contacting AGHE (http://www.aghe.org). Under “Publications” the AGHE website has a listing of suggested children’s books with aging content. All of the AGHE award books are noted and listed in this booklist.

The A is for Aging, B is for Books website by Lindsey McDivitt (http://www.lindseymcdivitt.com) is another resource. McDivitt provides reviews on children’s books with positive aging content and notes “Positive Aging picture books stay away from narrow portrayals of older adults and acknowledge the variety of interests, abilities, and talents that do not melt away with old age, but grow with experience.” McDivitt’s commentaries on this literature are interesting and informative.

Some Things to do:
- Review your attitudes about aging. Ageist attitudes are contagious
  - When sharing booklist books with children highlight the potentials of old age and activities the older adult is involved in. Refrain from promoting ageist stereotypes
- Contact your local schools and libraries to make sure these books are available
- Contact authors and publishers about the need for children’s books that promote positive aging and positive attitudes about aging
- Purchase and share books with children that promote positive aging
- Encourage intergenerational reading experiences that include older adults and children
- Promote positive attitudes about aging
- Be an advocate for positive aging

Children need to understand that there is great potential for good health, activity, happiness, and creativity at all stages of life. A foundation for positive aging needs to be established when people are young. Carefully selected children’s literature can help to lay this foundation. By promoting positive aging the quality of life can be improved for today’s and tomorrow’s elderly—of which today’s children will be a part.
An important factor influencing how people age is their attitude about aging. “Only as children view their own aging and the elderly positively will they be able to achieve the life, liberty, and pursuit of happiness that are considered rights of each in our society.” We have the potential to create a generation of Americans who see the potentials of old age and value older people. This is a legacy worth leaving.

Little Cliff lives with his great-grandparents, Poppa Joe and Mama Pearl. He loves going with Poppa Joe to the city where they would buy things. One day he was sent to buy a pound of Miz Callie’s special butter for Mama Pearl’s candied sweet potatoes. He knew he was supposed to come back as fast as he could, but also knew he must speak respectfully to each neighbor he saw along the way. The neighbors are older friends and family. Few stories have great-grandparents raising great-grandchildren. Addresses the contemporary phenomena of grandparents raising grandchildren. A heartwarming, intergenerational story with capable, active older people. MULTICULTURAL

Williams, Barbara (1975). *Kevin’s Grandma*
Puffin (PS-3) $9.25/$3.95
Kevin and his friend talk about their two very different grandmothers. Kevin's grandmother likes MAD magazine, rides a Honda, arm wrestles, practices yoga and judo, belongs to mountain-climbing/scuba diving/karate clubs, fixes her own roof, goes skydiving, takes her grandchildren on trips, and makes peanut butter soup. His friend's grandmother gives piano lessons, plays checkers with him, takes him to the ice cream parlor, belongs to bridge/garden/music clubs, keeps interesting scrapbooks, takes her grandchildren on trips, and volunteers her time. Both grandmothers are portrayed as interesting and help to illustrate to children the variety of activities older people can be involved in.

Winch, John (2000). *Keeping up With Grandma*
Holiday House (PS-3) $16.95
ISBN 9780823415632
Grandma and Grandpa are busy with their hobbies. Grandpa loves to paint and Grandma loves to bake. However, Grandma longs for adventure. She decides to do mountain climbing, sledding, white-water canoeing, diving, ballooning, cave exploring, horseback riding, and dancing. During all these adventures Grandpa is busy “keeping up” with Grandma. Shows older people as active and capable. Illustrates “lifespan activities”, activities people can be involved in as children and throughout life.
The young girl lives with her grandmother. She tells about her grandmother's beautiful skirts and how each skirt was worn for a different purpose. Grandmother’s yellow skirt was worn while cooking, her green skirt for planting corn. Other colored skirts were worn for things like weaving, picking herbs, picking nuts, making cedar beads, going to a Navajo dance, and herding sheep. Grandmother’s skirts swayed back and forth when she wore them. The grandmother shared her knowledge and wisdom with the girl. When the girl grows up she decides to have a skirt made with all the colors of her grandmother’s skirts, a skirt of many colors. This book is dedicated to all grandmothers who raised their grandchildren. Illustrations show Navajo life, culture and history. Intergenerational love and learning. The story is written in English and Navajo. There is a version of the book that contains a CD with the book text spoken in both languages.

A grandma makes the granddaughter a dress. The next year when the dress is outgrown the grandmother talks to the girl about saving the earth, and how they should use new material only if they have too. The girl decides she likes the shorter dress, grandma makes her a pair of leggings to go with it, and the dress is “recycled”. The next year grandma offers to make a new dress, but the granddaughter likes her old dress and wants to help the environment. Together they “recycle” the dress into a jumper and a new sweater knitted by grandma. The girl calls the dress her “forever dress”. When she does outgrow the dress she “recycles” it by giving it to her cousin to be her forever dress. Active grandmother who shares a good lesson about helping the environment.

Topical Listings

This listing is new to the booklist and hopefully will assist in finding topics of interest to the reader. If you find the listing helpful or have topics please let me know (smcguire@utk.edu).

Books for young children with older adults frequently focus on the role of grandparent and the older adult in a family setting. Children need to see that, as older adults, there are roles for them other than grandparents. More children’s books need to include older adults in diverse roles and settings.

Unfortunately, many topics such as older adults as leaders, volunteering, work, retirement, travel, companionship, fitness, marriage, lifelong learning, lifelong planning, and lifelong saving are not often mentioned in this literature. Content areas such as Social Security, Senior Olympics, Senior Centers, Medicare, Area Agencies on Aging, Administration on Aging, National Institute on Aging, Road Scholar (formerly Elderhostel), Older Americans Month, Older Americans Act, and Intergeneration Month are missing.
